

POWERBI PROJECT

Overview:

This project involves analyzing a dataset using Power BI and creating an interactive report with multiple visuals. The dataset used for this analysis is available at the following link:

[Dataset.](https://docs.google.com/spreadsheets/d/1kmZtwNrW9_M0WtZSqfjK89xXIAYUXTzr/edit?usp=sharing&oid=108249843804995578592&rtpof=true&sd=true)

Conclusion

This Power BI report provides a comprehensive financial dashboard that effectively visualizes key metrics such as total sales, manufacturing price, COGS, product count, unit sales, and gross sales. The inclusion of various interactive elements such as slicers, buttons, and bookmarks enhances the user experience by allowing easy navigation and filtering of data. The visualizations offer insightful analysis into sales performance, distribution across countries and products, and trends over time.
